

# Stabilizer Link

works in the background  
to support your car.

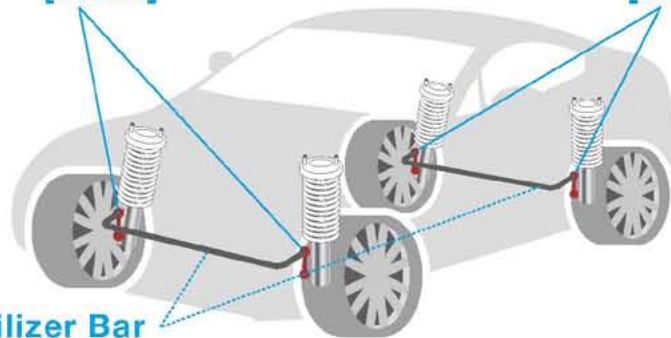

## What is Stabilizer Link?

Stabilizer Links attach the stabilizer bar to arms or axle housing to control body roll during a turn. A worn Stabilizer Link causes poor handling, tire wear, and noise.

Stabilizer Link [Front]

Stabilizer Link [Rear]

Stabilizer Bar

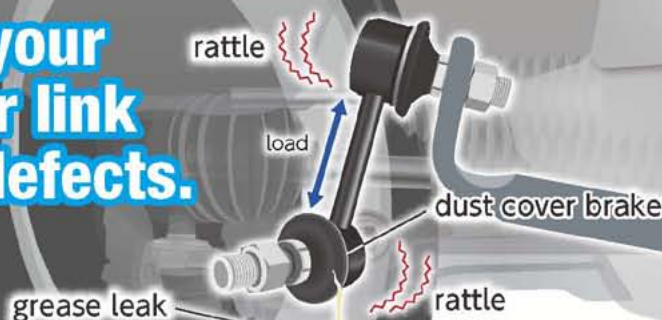

## Symptoms of worn stabilizer links:

### CHECK

Making unstable turnings or losing a balance when cornering.

Inspect your stabilizer link for any defects.

If you are aware of these symptoms or defects, choose **555** for replacement.
